

Stage

...

Create HS inst.

Solve HS inst.

...

```
conflicts = empty_table()
for constraint in constraints:
    cs = find_conflicts( constraint )
    conflicts.append( cs )
hs = hitting_set( conflicts )
```

```
delete_records = empty_table()
sol = solve_hitting_set( hs )
for record in sol:
    if record.val > 0:
        delete_records.add( record.id )
```
